

STA-CHOL®

Europe patent No. 1646289 – Canada patent No. 2532803
Japan patent No. 4316566 – Patent pending in Hong Kong and USA

TECHNICAL SHEET

1) Identification of the product:

Composition:

Active substance:

choline chloride

Other components:

vegetable oil, fatty acids of vegetable source

2) Specification:

Appearance

coated granules

Colour

yellowish to light brown

Titre a.i. (a) %

choline chloride: 50 g/100 g

*By-pass in situ (8 hours incubation,
in nylon bag in the rumen)*

min. 75%

a) Potentiometric determination

3) Recommended dosage:

dairy cows:

25 (Grade 20-50)g/head/day

fattening cattle:

10-30 g/head/day

lactating sheep and goats:

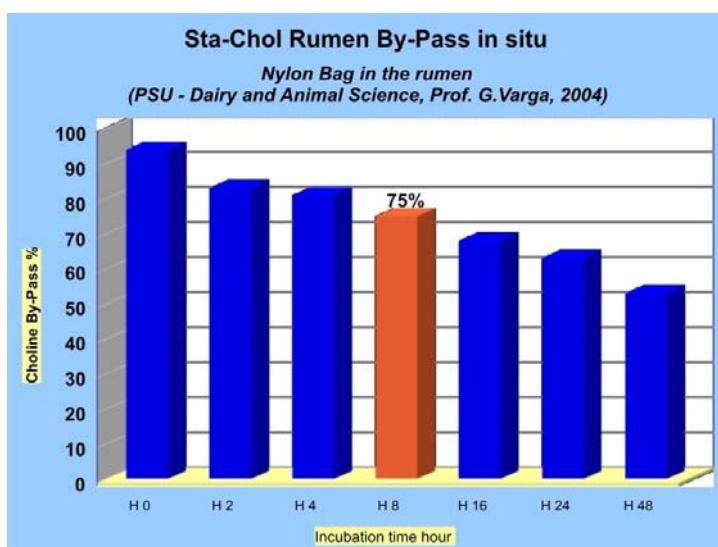

5-10 g/head/day

fattening lambs and kids:

3-5 g/head/day

4) Package:

25 - 10 kg carton
